Post-consumer recycled content and re-use

- Cardboard packaging includes 50% recyclable material
- Plastic packaging can be re-used and lasts 3 to 4 times longer
- Recycled material used in Marketing and Training collateral, RFPs and other business documents

Product materials recycled

- All batteries, circuit boards, straps and latches, and plastic cases are recycled

Energy efficient office equipment and recycled consumer based materials

- Energy efficient fluorescent bulbs and ballasts
- Recycled computers, monitors and toner cartridges
- Collection bins for recycled paper, aluminum cans and plastic containers
Industry environmental standards

BI voluntarily complies with WEEE and RoHS.

**WEEE - Waste Electrical and Electronic Equipment Directive**
- Sets collection, recycling and recovery targets for all types of electrical goods
- Aims to minimize the impact of these goods by recycling and reducing the amount that goes to landfills.

**RoHS – Restriction of Hazardous Substances**
- Bans placing new electrical and electronic devices that contain lead, cadmium, mercury and PBB’s into the market
