

The Cintas SafeWasher™

A Safer Way To Clean

The Cintas SafeWasher is simple and cost-effective to operate. It enhances productivity, promotes health and safety, produces measurable reductions in hazardous waste, and reduces exposure to risk.

Benefits of the Cintas SafeWasher:

- **Liability** – Can limit liability associated with hazardous waste removal when the unit is used as directed.
- **Performance** – Performs as well as hazardous chemical cleaners by lifting grease off the parts, leaving no oily residue.
- **Health and Safety** – Safer for your skin, and safer for the environment.

Advantages of Cintas Service:

- No inventory investment
- Ensures system is working at peak performance
- Hassle-free, reliable service of equipment
- Reduces costs associated with cleaning/maintenance
- Maintains facility safety

How does your parts washer stack up?

Performance

The Cintas SafeWasher is a no-nonsense parts washer that cleans as well as, or better than, any comparable product. Our aqueous cleaning solution is the best on the market, outperforming solvent on many applications.

Environment

Environmentally friendly, the Cintas SafeWasher fluid emits no toxic fumes and contains no toxic chemicals.

Safety

Our aqueous cleaning solution is a non-toxic, pH neutral, non-flammable cleaning solution that releases no harmful fumes.

Employee Health

The fluid is pH-neutral, protecting the health and well-being of your employees. Independent testing has concluded that it is a dermal non-irritant (it won't irritate skin).

Service

A Cintas service rep will visit your shop, check cleaning agent temperatures, refill the washer as needed, check hoses, and change the filter mat, ensuring your system is working at peak performance at all times.

Cost

Reduces operating costs by reducing or eliminating aerosol brake cleaners, reducing the need to haul away hazardous by-products.

Construction

Impact-resistant construction is specifically designed to work with our powerful blend of microbes. The machine can hold up to a 400-lb load and stands up to heavy use.

Limits Liability

The SafeWasher reduces the need to contract for hazardous waste removal.

Air Quality

Our aqueous based solution is the only effective cleaner that produces minimal VOC emissions, well below the most stringent regulatory standards.

Bioremediation

This is an EPA recognized technology which embraces the use of microorganisms. These microorganisms actively consume toxic compounds derived from grease, oil and other organic products and transform them into harmless carbon dioxide and water.
